Chair Cover Flower:

Napkin flowers:

Thank you Hand Ties:

Cake flowers:

1st Meeting Hints and Tips

... having as much information to hand at your first consultation will help the process of your first meeting.

- Download the free Roseparks Wedding App from www.roseparks.co.uk

- Prior to the meeting make sure you have checked your florists availability for your wedding date. Don't be afraid about booking too early especially if you know you want to work with a particular florist.
- Compare quotes from 2 or 3 florists but make sure the benchmark is the same for all, otherwise quotes may vary.
- Trust your florist. If after your first meeting you don't feel relaxed and confident that your florist has totally understood your needs and requirements then consider another florist. You must feel and trust your florist has understood you and your requirements.
- If your wedding date falls near an annual event e.g. Valentines/Mothers Day then think about your chosen flowers. All red flowers can be vastly more expensive around these times of year.
- Ask the florist how long your quote will take to prepare.
- Ask the florist if they can prepare a sample.
- Ask the florist for examples of previous work and/or testimonials.

Assist your Florist

- Let your florist know the flowers you like and just as important be sure to let them know what you don't like.
- Find out if anyone in your bridal party is allergic to a specific type of flower and let your florist know.
- A great way to help with colours and themes is to create an Inspiration or Mood Board. Use our very own Mood Board App to create and develop your colour schemes and style for your special day.
- Have dress (bride & bridesmaids) swatches available where possible.
- Remember that flowers are a natural product and blemishes or slight colour variations and sizes should be expected. If your colour requirements are more stringent then your florist can discuss ways of bringing about specific colours.
- Does your venue have any special instructions/restrictions e.g. no naked flame, no flower petals etc.
- Holding your ceremony and reception in the same venue is a good way of reducing costs, however if a 'turnaround' of the room is required discuss with your florist who will do this e.g. venue or florist.

Bridal and Venue Deliveries

Be precise with delivery addresses and times and provide information on access times for church and venue.

Ensure all delivery addresses contain a full address e.g. House Name, Flat/House Number, Full Postal Address including Post Code. Inform your florist of any known road closures or obstructions within the proximity of the delivery address areas which may give rise to delays.
(See separate Roseparks Delivery Address Form)

Ask your florist if they pick up after the wedding and whether you need to organise this with the church/venue.

Additional Information:

On most occasions we like to feature a summary article on our blog along with a few images of your special day. We also like to credit your other chosen suppliers by name and website link. We would be grateful if you could provide this information in the following table - no obligation.
